

34 The I – V characteristics of two electrical components P and Q are shown.

Which statement is correct?

- A** For a current of 0.5 A, the power dissipated in Q is double that in P.
- B** For a current of 1.9 A, the resistance of Q is approximately half that of P.
- C** The resistance of Q increases as the current in it increases.
- D** P is a fixed resistor and Q is a filament lamp.
