

- 7 The results of the α -particle scattering experiment provided evidence for the existence and small size of the nucleus.

(a) State the result that provided evidence for

- (i) the small size of the nucleus, compared with the atom,

.....
.....
.....[2]

- (ii) the nucleus being charged and containing the majority of the mass of the atom.

.....
.....
.....[2]

- (b) The α -particles in this experiment originated from the decay of a radioactive nuclide. Suggest two reasons why β -particles from a radioactive source would be inappropriate for this type of scattering experiment.

1.
.....
2.
