

- 3 The power output  $P$  of a star can be modelled with the equation

$$P = \sigma AT^4$$

where  $\sigma$  is a constant,  $A$  is the surface area of the star and  $T$  is the surface temperature of the star.

What are the SI base units of  $\sigma$ ?

- A  $\text{kg s}^{-2} \text{K}^{-4}$
- B  $\text{kg s}^{-3} \text{K}^{-4}$
- C  $\text{kg m}^{-1} \text{s}^{-2} \text{K}^{-4}$
- D  $\text{kg m}^{-1} \text{s}^{-3} \text{K}^{-4}$
