

- 23** A glass tube is closed at one end and has a loudspeaker at the other end.

A stationary wave is formed with a node at the closed end of the tube when the sound has frequency f_0 . There are no other nodes.

The frequency of the sound is then slowly increased.

What is the frequency of the sound that produces the next stationary wave?

- A** $1.25f_0$ **B** $1.50f_0$ **C** $2.00f_0$ **D** $3.00f_0$

24 With which of the following frequencies will the tube produce a stationary wave?
