

- 21** A load is hung from the end of a metal wire. The load is increased and the wire stretches elastically. The table shows the length of the wire for different loads.

load / kN	length / mm
0	500.0
1.0	502.0
2.0	504.0
3.0	506.0
4.0	508.0

When the load is 4.0 kN, what is the strain energy stored in the wire?

- A** 16 J **B** 32 J **C** 1.0 kJ **D** 2.0 kJ

- 22** The graph shows the relationship between the force applied to a wire and the extension of the wire.
