

- 4 A block of mass  $m$  oscillates vertically on a spring, as shown in Fig. 4.1.

Fig. 4.1

The acceleration  $a$  of the block varies with displacement  $x$  from its equilibrium position, as shown in Fig. 4.2.

Fig. 4.2

The amplitude of the oscillations is  $3Y$  and the maximum acceleration is  $2A$ .

- (a) Explain how Fig. 4.2 shows that the oscillations of the block are simple harmonic.

.....  
 .....  
 ..... [2]

(b) Deduce expressions, in terms of some or all of  $m$ ,  $A$  and  $Y$ , for:

(i) the angular frequency  $\omega$  of the oscillations

$$\omega = \dots\dots\dots [1]$$

(ii) the maximum speed  $v_0$  of the oscillations

$$v_0 = \dots\dots\dots [2]$$

(iii) the energy  $E$  of the oscillations.

$$E = \dots\dots\dots [2]$$

(c) The period of the oscillations is 0.75 s and the value of  $3Y$  is 1.8 cm.

Determine an expression for  $x$  in terms of time  $t$ , where  $x$  is in cm and  $t$  is in seconds.

$$x = \dots\dots\dots [2]$$
