

30 What is meant by electric field strength?

- A** force per unit charge acting on a small mass
- B** force per unit charge acting on a small positive charge
- C** force per unit mass acting on a small mass
- D** force per unit mass acting on a small positive charge

31 The electric field between two parallel plates with a potential difference of 500 V is 500 V m⁻¹. What is the separation between the plates?
