6 **(a)** any two of:
large number of molecules / atoms / particles
molecules in random motion
no intermolecular forces
elastic collisions
time of collisions much less than time between collisions
volume of molecules much less than volume of containing vessel B1 + B1 [2]

(b) molecules collide with the walls
<u>change in momentum</u> of molecules implies force (on molecules)
molecules exert equal and opposite force on wall
pressure is averaging effect of many collisions
(*any three statements, 1 each*) B3 [3]

7 **(a)** when waves overlap / meet, (resultant) displacement is the sum of the individual
