

11 The driver of a car applies two parallel forces to a steering wheel, as shown.

Each force has a magnitude of 15 N and acts in the direction shown. The steering wheel has a diameter of 0.40 m.

What is the torque exerted on the steering wheel?

- A** 1.3 Nm
- B** 2.5 Nm
- C** 2.7 Nm
- D** 5.4 Nm
