

16 Which expression could be used to calculate power?

A
$$\frac{(\text{current})^2}{\text{resistance}}$$

B
$$\frac{\text{force} \times \text{displacement}}{\text{time}}$$

C
$$\text{current} \times (\text{resistance})^2$$

D
$$\frac{\text{weight}}{\text{time}}$$

17 All of the following are units of power except
