

Question	Answer	Marks
10(a)(i)	<i>either</i> product of flux density and area	M1
	direction of flux normal to area	A1
	<i>or</i> flux density $\times$ area $\times \sin \theta$	(M1)
	where θ is angle between direction of flux and area	(A1)
10(a)(ii)	(induced) e.m.f. proportional to rate	M1
	of change of (magnetic) flux linkage	A1
10(b)	$\text{e.m.f.} = \Delta(\phi N) / \Delta t$ $= (6.8 \times 10^{-6} \times 2 \times 3.5 \times 96) / (2.4 \times 10^{-3})$	C1
	= 1.9 V	A1

Question	Answer	Marks
10(c)	alternating	C1
	with same frequency as supply	A1

Question	Answer	Marks
11(c)	no forbidden band / valence and conduction bands overlap	B1
