

- 1 (a) (i) mass / volume ...(ratio must be clear)..... B1
- (ii) kg m^{-3} OR kg / m^3 B1 [2]
- (b) v has unit of m s^{-1} B1
- p / ρ has unit of $\text{kg m}^{-1} \text{s}^{-2} / \text{kg m}^{-3}$ (no e.c.f. from (a)) M1
- $\sqrt{(p / \rho)}$ has unit of m s^{-1} A1
- LHS = RHS so γ has no unit A0 [3]
