

3(a)(i)	in a stationary wave energy is not transferred or in a progressive wave energy is transferred	B1
3(a)(ii)	in a stationary wave (adjacent) particles are in phase or in a progressive wave (adjacent) particles are out of phase/have a phase difference/not in phase	B1
3(b)(i)	(position where) maximum amplitude	B1
3(b)(ii)	distance = 0.10 m	B1
3(b)(iii)	1. $\lambda = 0.60/1.5$ = 0.40 m	A1
	2. $v = f\lambda$	C1
	$f = 340/0.40$ = 850 Hz	A1
3(b)(iv)	$\lambda = 2 \times 0.60$ or $\lambda = 3 \times 0.40$ or $f = 850/3$	C1
	$f = 280$ (283) Hz	A1
