

5	(a) haphazard / random / erratic / zig-zag movement of (smoke) particles (<i>do not allow molecules / atoms</i>)	M1	A1	[2]
	(b) motion is due to unequal / unbalanced collision rates <u>s</u> (on different faces) (unequal collision rate due to) random motion of (gas) molecules / atoms	B1	B1	[2]
	(c) <i>either</i> collisions with air molecules average out this prevents haphazard motion <i>or</i> particle is more massive / heavier / has large inertia (M1) collision <u>s</u> cause only small movements / accelerations (A1)	M1	A1	[2]

6 (a) waves incident at an edge / aperture / slit / (edge of) obstacle M1
