

1(a)(i)	two correct scalar quantities e.g. time, mass, distance, temperature	B1
	two correct vector quantities e.g. force, acceleration, velocity, displacement	B1
1(a)(ii)	magnitude	B1
	unit	B1
1(b)(i)	north component of velocity = 11 m s^{-1}	A1
	east component of velocity = 7.5 m s^{-1}	A1
1(b)(ii)	velocity = $7.5 - 2.7$ $= 4.8 \text{ m s}^{-1}$	A1
1(b)(iii)	velocity = $\sqrt{11^2 + 4.8^2}$	C1
	$= 12 \text{ m s}^{-1}$	A1
1(b)(iv)	angle = $\tan^{-1} (4.8 / 11)$	C1
	$= 24^\circ$	A1
