

3(a)	(velocity =) change in displacement / time	B1
3(b)(i)	$a = 2400 / 1200$ $= 2.0 \text{ m s}^{-2}$	A1
3(b)(ii)	straight line from the origin with positive gradient (labelled A)	M1
	ending at (20, 40)	A1
3(c)(i)	line starting at origin (with the same gradient as A) and beneath A at all points	B1
	gradient decreasing to zero	B1
	straight horizontal line from $t = 12 \text{ s}$ and ending at $t = 20 \text{ s}$ (and labelled B)	B1
3(c)(ii)	the velocity/speed will increase	B1
	to a new terminal/constant/maximum velocity/speed	B1
	or	
	the car has an acceleration	(B1)
	to a new (higher) terminal/constant/maximum velocity/speed	(B1)
