

2(a)	point where (all) the weight (of the body)	M1
	is considered/seems to act	A1
2(b)(i)	horizontal component of force = $38 \cos 60^\circ$ or $38 \sin 30^\circ$ = 19 N	A1
2(b)(ii)	$(T \times 1.2)$ or (19×0.9) or 17	C1
	$(T \times 1.2) = (19 \times 0.9)$ $T = 14 \text{ N}$	A1
2(b)(iii)	$F = 45 + 38 \sin 60^\circ$ = 78 N	A1
