

2(a)	force $\times$ displacement in the direction of the force	B1
2(b)	units: $\text{kg m s}^{-2} \times \text{m} = \text{kg m}^2 \text{s}^{-2}$	A1
2(c)	T_1 : K and T_2 : K	C1
	A : m^2 and t : s and L : m	C1
	$c = (\text{kg m}^2 \text{s}^{-2} \text{m}) / (\text{m}^2 \text{K s})$ $= \text{kg m s}^{-3} \text{K}^{-1}$	A1
