

2(a)	(thermal) energy per unit mass (to cause temperature change)	B1
	(thermal) energy per unit change in temperature	B1
2(b)(i)	work done correct (0)	B1
	increase in internal energy correct (+ E)	B1
2(b)(ii)	work done correct ($-W$) and increase in internal energy same as (b)(i)	B1
	thermal energy correct so that it adds to work done to give increase in internal energy	B1
2(c)	more thermal energy needed so specific heat capacity is greater	B1
