

Question	Answer	Marks
4(a)	stress per unit strain	B1
4(b)(i)	straight line with positive gradient passing through origin	B1
4(b)(ii)	spring constant	B1
4(b)(iii)	elastic potential energy (stored in wire)	B1
4(c)	length (of Q) is half (the length of P)	B1
	extension is proportional to length, and inversely proportional to area and Young modulus	B1
	extension of Q is $= \frac{1}{2} / (2 \times 2)$ $= \frac{1}{8}$ times the extension of P	B1

Question	Answer	Marks
