

(calculated answer with no sketch – no marks)

			Total	[6]
2	(a)	(i) $\lambda = 0.6 \text{ m}$	B1	
		(ii) frequency ($= v/\lambda$) = $330/0.60$ = 550 Hz <i>(use of $c = 3 \times 10^8 \text{ ms}^{-1}$ scores no marks)</i>	C1 A1	[3]
		(b) amplitude shown as greater than a but less than $2a$ and constant correct phase <i>(wave to be at least three half-periods, otherwise -1 overall)</i>	B1 B1	[2]
			Total	[5]
3	(a)	(i) scatter of points (about the line)	B1	
		(ii) intercept (on f^2 axis)	B1	[2]
