

5	(a) (i) field shown as right to left	B1	[1]
	(ii) lines are more spaced out at ends	B1	[1]
	(b) Hall voltage depends on angle <i>either</i> between field and plane of probe <i>or</i> maximum when field normal to plane of probe <i>or</i> zero when field parallel to plane of probe	M1	A1
	(c) (i) (induced) e.m.f. proportional to rate of change of (magnetic) flux (linkage) <i>(allow rate of cutting of flux)</i>	M1	[2]
	(ii) e.g. move coil towards/away from solenoid rotate coil vary current in solenoid insert iron core into solenoid <i>(any three sensible suggestions, 1 each)</i>	B3	[3]
