

- 5 (a) two capacitors in series
 or any circuit such that $V \leq 25$ V across any C B1
 in parallel with second series pair or any correct combination B1 [2]
- (b) two capacitors in series in parallel with a single capacitor
 or other correct combination B2 [2]
 (leads not shown, then -1 overall)

6 (a) E field, force independent of speed. B field, force $\propto$ speed B2
