

7(a)	X-ray photon produced when electron is decelerated	B1
	larger acceleration results in larger photon energy	B1
	continuous range of accelerations so continuous spectrum of wavelengths/frequencies	B1
7(b)	electron in (inner shell of) target atom is excited (on collision)	B1
	electron de-excites causing emission of a photon	B1
	discrete energy levels so discrete photon wavelengths	B1
