

4	(a) apparatus: cell with particles e.g. smoke (container must be closed) diagram showing suitable arrangement with light illumination and microscope	B1	B1	[2]
	(b) specks / flashes of light in random motion	M1	A1	[2]
	(c) cannot see what is causing smoke to move hence molecules smaller than smoke particles	(B1)		
	continuous motion of smoke particles implies continuous motion of molecules	(B1)		
	random motion of particles implies random motion of molecules	(B1)		
		max. 2	[2]
