

9	(a) (i)	light-dependent resistor/LDR	B1	[1]
	(ii)	strain gauge	B1	[1]
	(iii)	quartz/piezo-electric crystal	B1	[1]
	(b) (i)	resistance of thermistor decreases as temperature increases	M1	
		<i>either</i> $V_{OUT} = V \times R / (R + R_T)$		
		<i>or</i> current increases <u>and</u> $V_{OUT} = I R$	A1	
		V_{OUT} increases	A1	[3]
	(ii)	<i>either</i> change in R_T with temperature is non-linear		
		<i>or</i> V_{OUT} is not proportional to R_T / change in V_{OUT} with R_T is non-linear	M1	
		so change is non-linear	A1	[2]
