

8	(a)		product of force and distance moved in the direction of the force	M1 A1	[2]
	(b)	(i)	falls from rest	B1	[3]
			decreasing acceleration	B1	
			reaches a constant speed	B1	
		(ii)		straight line with negative gradient	
		y-axis intercept above maximum E_K	B1		
		reasonable gradient (same magnitude as that for E_K initially)	B1
