

5(a)	(incident) wave reflects at end/top of tube	B1
	(incident) wave and reflected wave interfere/superpose	B1
5(b)	line has maximum value of amplitude at $h = 0$ and $h = 0.60$ m only	B1
	line has minimum/zero value of amplitude at $h = 0.30$ m only	B1
5(c)(i)	vertical/along length of tube/along axis of tube	B1
5(c)(ii)	phase difference = 0	A1
5(d)	$v = f\lambda$	C1
	$v = 340 / (2 \times 0.60)$ $= 280$ Hz	A1
5(e)	$f = 340 / 0.60$ $= 570$ Hz	A1
