

4 (a) pressure = force / area (normal to force) A1 [1]

(b) molecules/atoms/particles in (constant) random/haphazard motion	B1	
molecules have a <u>change</u> in momentum when they collide with <u>the walls</u>	M1	
(force exerted on molecules) therefore force on the walls	A1	
reference to average force from many molecules/many collisions	A1	[4]

(c)	elastic collision when <u>kinetic</u> energy conserved	B1	
	temperature constant for gas	B1	[2]
