

- 5 (a) only curve with decreasing gradient M1
acceptable value near $x = 0$ and does not reach zero A1 [2]

(if graph line less than 4.0 cm do not allow A1 mark)
(no credit if graph line has positive and negative values of V_H)

- (b) graph: from 0 to $2T$, two cycles of a sinusoidal wave M1
all peaks above 3.5 mV C1
peaks at 4.95/5.0 mV (*allow 4.8 mV to 5.2 mV*) A1 [3]

- (c) e.m.f. induced in coil when magnetic field / flux is changing / cutting B1

either at each position, magnetic field does not vary
so no e.m.f. is induced in the coil / no reading on the millivoltmeter
or at each position, switch off current and take millivoltmeter reading
or at each position, rapidly remove coil from field and take meter reading B1 [2]
