

2 (a) mean speed = $1.44 \times 10^3 \text{ m s}^{-1}$ A1 [1]

(b) evidence of summing of individual squared speeds	C1	
mean square speed = $2.09 \times 10^6 \text{ m}^2 \text{ s}^{-2}$	A1	[2]

(c) root-mean-square speed = $1.45 \times 10^3 \text{ m s}^{-1}$ A1 [1]
(allow ECF from **(b)** but only if arithmetic error)
