

5	(a)	metal: crystalline / lattice / atoms in regular pattern	B1	
		(atoms in regular) pattern that repeats itself (within crystal)	B1	[2]
		polymer: long chains of atoms / molecules	B1	
		chain consists of 'units' that repeat themselves	B1	[2]
	(b)	(i) e.g. latex is soft / not strong / flows / ductile	B1	
		elastic limit easily exceeded	B1	[2]
	(ii)	<i>(allow any two sensible comments, 1 each)</i>		
		more solid / does not flow / stronger / higher ultimate tensile stress more brittle elastic limit much higher increased toughness <i>(any two, 1 each)</i>	B2	[2]
6	(a)	(i) $R = \rho l / A$	B1
