

Question	Answer	Marks
4(a)	e.g. microphone weighing scales/pressure sensor lighters/spark generation watches/clocks/regulation of time	B1
4(b)	<u>pulses</u> (of ultrasound)	B1
	reflected at boundaries (between media)	B1
	(reflected pulses) detected by (ultrasound) generator	B1
	Any three from: - time delay (between transmission and receipt) gives information about depth (of boundary) - intensity of reflected pulse gives information about (nature of) <u>boundary</u> - gel used to minimise reflection at skin/maximise transmission into skin - degree of reflection depends upon impedances of two media (at boundary)	B3
