

- 5 (a) transfer / propagation of energyM1
as a result of oscillations / vibrations A1 [2]
- (b) (i) displacement / velocity / acceleration (of particles in the wave) B1 [1]
- (ii) displacement etc. is normal to direction of energy transfer /
travel of wave / propagation of wave(not 'wave motion') B1 [1]
- (iii) displacement etc. along / same direction of energy transfer /
travel of wave / propagation of wave(not 'wave motion') B1 [1]
- (c) diffraction: suitable object, means of observationM1
either laser *or* lamp and aperture
or distant sourceM1
light region where darkness expected A1
- interference: suitable object, means of observation and illumination B1
light and dark fringes observed B1
appropriate reference to a dimension for diffraction or
for interference B1 [6]

[Total: 11]

- 6 (a) energy transferred from source / changed from some form to electrical M1
