

- 5 (a) (i) frequency f B1
- (ii) amplitude A B1
- (b) π rad or 180° (unit necessary) B1 [1]
- (c) (i) speed = $f \times L$ B1 [1]
- (ii) wave is reflected at end / at P B1
either incident and reflected waves interfere
or two waves travelling in opposite directions interfere M1
 speed is the speed of incident or reflected wave / one of these waves A1 [3]

[Total: 7]

- 6 (a) total resistance in series = $2R$
