

3 (a)	point at which (whole) weight of body	M1	
	may be <u>considered</u> to act	A1	[2]
	(allow definition based on gravitational force)		
(b) (i)	380 N	B1	
(ii)	position nearer A than B	B1	
(iii)	clear indication about which point moments are taken	B1	
	e.g. $950 \times x = 380 \times 1.7$	C1	
	$x = 68 \text{ cm}$	C1	
	distance = 108 cm or 1.08 m (accept 2 sig fig)	A1	[6]
